SYMBOL LEGEND

Because there is no universally accepted standard to designate products as environmentally preferable, we have adopted the Enviro-conscious symbol to highlight products identified by their manufacturer as having one or more of the following attributes: reduced VOCs, compostable, biodegradable, recyclable, contains recycled content, or other environmental attributes that make the product[†] less harmful to the environment or humans, when compared to its traditional counterparts. Many of the products marked with the Enviro-conscious logo have been endorsed by third-party certifying organizations, such as Green Seal, the Carpet & Rug Institute, EcoLogo and the Biodegradable Products Institute; where applicable, third-party certifications are noted in the product descriptions. Please note that we do not independently verify the environmental attributes, but instead rely on the respective manufacturer and/or third-party certifying organization. A "green dot" ● at the end of a stock number indicates the product is Enviro-conscious.

[†] These environmental attributes refer to the products themselves and not the processes for manufacturing and transporting the products.

Manufacturers may submit their products for evaluation by Green Seal™. Those that comply with the requirements are authorized to use the Green Seal™ Certification Mark on their products. Green Seal™ is dedicated to safeguard the environment and promotes environmentally responsible products and services. www.greenseal.org

The CRI (Carpet and Rug Institute) Seal of Approval program identifies effective carpet cleaning solutions and equipment that clean carpet right the first time and protect a facility's carpet investment. Not all products clean well enough to earn the Seal of Approval distinction, so look for the blue and green CRI Seal of Approval as proof that you are purchasing or using a quality product. The CRI Seal of Approval logo is a trademark of the Carpet & Rug Institute. www.carpet-rug.org

Dilution Chart

Use this chart as a guideline for diluting the products sold in this catalog. 1:x means 1 part concentrate to x parts water. For example, to make a quart of solution in a 1:15 dilution, mix 2 oz. of concentrate into 30 oz. of water. (NOTE: To minimize foaming, fill the container with water before adding the concentrate. Then stir thoroughly.)

A. Febreze® Fabric Refreshers

Febreze® cleans away odors trapped in fabrics; it's not a 'cover-up' product. Proprietary cleaning system goes to the source of odors and eliminates them. Spray directly on fabrics until slightly damp. As it dries, odors disappear. Patented binding technology locks on to odor molecules and traps them for good. Leaves the treated area smelling fresh and clean. Safe for virtually all fabrics.

SKINCARE & PERSONAL HYGIENE

FEMININE CARE & HYGIENE, HAND SANITIZERS, PERSONAL CARE, SOAPS & DISPENSERS

HERE'S TO HEALTH: Skin Care Solutions

Product Type	Uses
Hand Soaps	<p>Hand soaps are the tried and true solution to remove soils and germs from hands when water is readily available. Many options are available including: traditional, anti-bacterial, foam, scented and colored. Ideal for bathrooms, break rooms and kitchens. (Find these on pages 116–152)</p> 
Instant Hand Sanitizers	<p>Instant hand sanitizers are great at killing germs that make people sick. Usually alcohol based, these products kill germs quickly without the need for water. Many sanitizer options are available including bottles, dispensers, wipes, foams and gels. Use sanitizer to supplement routine hand washing because it helps reduce the risk of infections. Ideal in healthcare, foodservice, education and office facilities, as well as high traffic public areas. (Find these on pages 107–115)</p> 
Manual Dispensers	<p>Manual dispensers are economical dispensers that get the job accomplished. Ideal for high traffic areas. Best suited for rugged placements such as mechanic shops, industrial facilities and warehouses. (Find these on pages 111, 112, 120, 122–133)</p> 
Touch-Free Dispensers	<p>Touch-free dispensers allow users to receive the proper amount of product without touching a possibly contaminated dispensing unit. These dispensers eliminate users touching a germ hot spot – the push button on manual dispensers. Touch-free dispensers usually require batteries to operate. (Find these on pages 107, 109, 110, 117–120)</p> 
Sanitizing Wipes	<p>Sanitizing wipes are perfect for cleanup of hands while killing germs that make people sick. Ideal for break rooms, cafeterias and restaurants. Wipes are available in canisters and pre-wrapped individual packets. The pre-wrapped packets are small, making them ideal solutions for on-the-go sanitizing. (Find these on pages 113, 465)</p> 
Heavy-Duty	<p>Heavy-duty hand cleaners remove tough soils. Each product is specialized to remove specific soils such as adhesives, carbon black, epoxies, gasoline, tar, grease, dirt, oil, paint, sealants and urethanes. It is best to choose the right product for the soil that needs to be removed. Check the product description for more information about its cleaning power. Heavy soils can be tough on hands and a separate skin conditioner is recommended. (Find these on pages 147–152)</p>

THE BENEFITS OF SEALED REFILLS

It may surprise you to learn that refillable bulk soap dispensers can actually spread more germs to your hands after washing than you may have had to begin with. Germs in the air and foreign objects can find their way into a dispenser when the lid is opened for refilling. Using sealed soap dispensers and refills will help lock out germs from the soap itself, plus they include a fresh dispensing valve with each refill, so there's no long-term exposure to the germ-filled washroom environment. And, the snap-in soap refill cuts labor time and replacement costs, and eliminates the hassle of refilling dispensers from a bulky jug.

FOAM SOAP OR GEL?

Why choose foam soap over gel? Foam soap can be more effective against most common disease-causing germs and bacteria. It has no sticky feeling after applying, unlike gel soap that can contain a thickening agent. There is less clogging of the dispenser tip and less residue buildup on the skin, unlike with thick gels. Foam soap can also be applied more quickly over a wider surface, as it is applied as a foam and remains in that state, while the gel soap liquefies almost on contact with the hands, making it very difficult to manage the application without spilling or splashing.

TOUCHLESS SOAP DISPENSING

One of the most efficient ways to prevent the spread of germs is to avoid touching surfaces. Touchless soap dispensing systems use sensor technology to dispense fresh soap from an enclosed dispenser, eliminating cross-contamination and helping reduce the spread of germs. Controlled dispensing reduces soap consumption so there are fewer chemicals in the waste stream and water usage is reduced. More hand washes per refill means less packaging waste. Disposable refills keep soap fresh and clean, providing a more sanitary system. And the sensor technology recognizes when hands are present without contact, keeping the surface of the dispenser free from smudges, germs or grease.

FOAM SOAP

Foam soap's thick, luxurious feel is the preferred soap by most users, helps save money and reduces waste, in contrast with regular liquid soap, which may spill onto the sink or into the drain. In cost-conscious applications, it can be a much better choice than conventional soap, with fewer refills needed. Foam soap's bubbly lather has better coverage, and rinses more easily.

FOAP SOAP VS. LIQUID SOAP

The popularity of foam hand soap over liquid hand soap amongst end users is growing, due in part to its being more economical, effective and easy to clean. Foam soap systems are ideal for high-traffic and commercial restrooms, where touchless soap dispensers can distribute the right amount of product directly into users' hands, lessening the chance for cross-contamination and ensuring that the product doesn't end up on floors, sinks and counters. Because of its lathering qualities, patrons are less inclined to go back to foam dispensers for more soap, meaning facilities cut back not only on product and packaging waste, but also on water. Foam hand soap also saves on labor costs. It needs less refilling, drips less than liquid soap and doesn't build up on the floor and become slippery the way that liquid soap can.

15-LG-AN

FMX™ SYSTEM

Specially designed foaming formulas, enriched with vitamins and moisturizers, provide an amazingly gentle cleansing experience along with a fresh, clean scent. Push dispensers, with viewing window for easy maintenance, offer a generous portion of soft, gentle foam. Air is infused into the soap as it is dispensed, resulting in a rich, creamy lather.

FREQUENT HANDWASHING

Handwashing is easy to do and it's one of the most effective ways to prevent the spread of many types of infection and illness in all settings—from the home and workplace to child care facilities and hospitals. It requires only soap and water or an alcohol-based hand sanitizer. Although it's impossible to keep your hands germ-free, washing your hands frequently can help limit the transfer of bacteria, viruses and other microbes.

Always wash your hands before:

- Preparing food or eating.
- Treating wounds, giving medicine, or caring for a sick or injured person.
- Inserting or removing contact lenses.

Always wash your hands after:

- Preparing food, especially raw meat or poultry.
- Using the bathroom or changing a diaper.
- Touching an animal or animal toys, leashes or waste.
- Blowing your nose, coughing or sneezing into your hands.
- Treating wounds or caring for a sick or injured person.
- Handling garbage, household or garden chemicals, or anything that could be contaminated.

DOES ANTIBACTERIAL SOAP MAKE A DIFFERENCE?

Handwashing is recognized by the Centers for Disease Control and Prevention (CDC) as one of the most important means of preventing germs from spreading. Washing hands with plain soap initially removes some germs, but germs left on the hand can quickly regrow and multiply. Washing hands with an antibacterial soap results in reduced bacterial growth on the skin than when washing with plain soap, because a very small amount of the antibacterial ingredient remains on the skin after rinsing to control the growth of bacteria. However, the antibacterial components of soaps (usually triclosan or, less commonly, triclocarbon) need to be left on a surface for about two minutes in order to work. Most people are not this patient and end up washing off the soap before the antibacterial ingredients can do their job. The bottom line is, though, that antibacterial soaps kill or inhibit more bacteria that cause odor, skin infections, food poisoning, intestinal illnesses and other commonly transmitted diseases than washing with soap alone.

NATIONAL BRAND QUALITY FOR A VALUE PRICE

As indicated by the steady growth of private brand both tissue sales, consumers are moving from national to private brands, according to an article in Tissue World Magazine. On average, consumers save 22% on their chosen private brand solutions over national brand products. However, it seems that choosing private brands has as much to do with preference as saving money. Today, 72% of consumers buy private brands out of preference rather than a necessity. Private brand products must offer something that speaks to the consumers' particular lifestyles, values and needs. For example, consumers embracing a healthier lifestyle are looking for household paper products to satisfy needs ranging from antiviral and antibacterial properties to sensitive skin issues. Private brand paper products with these value-added benefits are adding a new dimension to the category that drives shopper loyalty.

VACUUMS

Industrial

Industrial upright vacuums are as heavy-duty as their name implies. Ideal for offices, government buildings and hotels. Select a vacuum with a wide cleaning path to clean large, minimally furnished rooms in less time; other widths are available for other layouts. A great choice for day cleaning, quiet operation features are a real advantage. Look for large-capacity shake-out bags or dust cups and extra-long power cords to maximize cleaning efficiency, save time and reduce maintenance. *(pages 258, 259)*

Filtration

Choose HEPA uprights to improve indoor air quality. A HEPA vacuum filter or bag retains 99.97% of allergens as small as 0.3 microns – or about 240 times smaller than a human hair. Items with HEPA classification range from vacuum filters and disposable dust bags, to completely sealed systems that force all of the air leaving the vacuum through a HEPA exhaust filter. Ideal for hospitals, schools and certified green buildings. *(pages 255, 256, 259)*

Lightweight

A lightweight vacuum is built for quick, frequent cleanups and maneuverability. In spaces with furniture and other obstacles, this type is ideal for hotels, doctors' offices and schools. Choose from options such as cordless sticks and compact deep cleaners that deliver the same powerful performance of a full-sized machine. Many lightweight cleaners offer superior filtration, onboard tools and carpet height adjustment controls. *(pages 255, 256)*

Backpack

Backpack vacuums offer mobility as well as quiet operation. Back and shoulder straps secure the cleaner to the maintenance worker, adding to comfort and ease of carrying. Choose closed bag systems and highly effective multi-stage filtration, in which multiple layers of material thoroughly remove soil particles. HEPA filtration renders a backpack vacuum appropriate for environments where indoor air quality is a concern. Many models are surprisingly lightweight. Ideal for spaces with large expanses of bare floors and areas containing an abundance of furniture such as office buildings, schools and hospitals. *(page 263)*

Canister

Canister vacuums are flexible and compact, making them ideal to reach into inaccessible areas that are often hard to clean. Easy, powerful detail cleaning is enhanced by attachments including upholstery tools, dusting brushes and wand extension. Models with shoulder straps transport more easily and HEPA-ready units help improve indoor air quality. Ideal for spaces that demand detail cleaning and those with an abundance of hard surfaces and stairs, such as schools, hospitals, hotels and office buildings. *(page 262)*

Carpet Extractors

Carpet extractors come in many shapes and sizes, from spot cleaners to full-size models with powered brushes to deep-clean large carpeted areas. Features like revolving brushrolls, fingertip controls, metal cleaning wands and large-capacity solution tanks add value. Ideal for use in spaces with high-traffic areas like offices, hotels and government buildings. *(pages 265–267)*

Floor Machines

Get hard surfaces to shine in high-traffic areas in schools, government buildings and hospitals. These units are designed to maintain and restore hard floors with the use of different pads or brushes for scrubbing, stripping, buffing or polishing. For this heavy-duty work look for quality construction. UL Approved models offer durable steel gears and parts. Smooth operation features, multi-speed motors and a safety shutoff switch, add to ease of use. *(pages 268–269)*

For keys **B, C & D**: Certified by the Carpet and Rug Institute. Sealed HEPA filtration captures 99.97% of allergens and pollen down to 0.3 microns. Meets requirements set by LEED guidelines. Washable HEPA filter included reduces replacement costs.

Lightweight commercial upright with allergen filtration. Filters 96.7% of all particles down to 0.3 microns. Certified by the Carpet and Rug Institute.

ULTRA HIGH-SPEED FLOOR PADS

The right abrasive paired with the proper fibers using proprietary manufacturing techniques yields a pad that is durable and reusable, helping to postpone end-of-life disposal to landfills. Beginning in March 2014, the polyester fiber used to make a range of floor pads* will contain a minimum of 50% post-consumer recycled content. The polyester fiber used is third-party certified for post-consumer recycled content. Use of these products helps contribute to LEED® EB v2.0—MR Credit 5.1—5.3 Occupant Recycling, LEED® EB v2.0 IUOM Credit 1.1—1.4 Innovations in Upgrades, Operations and Maintenance, LEED® EB Operations & Maintenance—MR Credit 5.1—5.3 Occupant Recycling, LEED® EB Operations & Maintenance—Innovation Credit 1.1—1.4: Innovation in Operations, LEED® EB v3.0—MR Credit 7: Solid Waste Management—Ongoing Consumables, LEED® EB v3.0—IO Credit 1: Innovation in Operations. GETTING TO GRIPS WITH GLOVES

	Glove Type	Material	Uses	Page(s)
	Disposable/Single Use	Vinyl, PVC, Latex, Nitrile	Small parts handling, food handling, medical and lab use, manufacturing. Nitrile is a good choice for those with latex allergies. Suitable for light-duty tasks.	279–283
	Knit	Cotton/Polyester	Use as a liner or for additional protection and grip. Suitable for light-duty tasks.	286–290
	Driver's	Cowhide, Pigskin, Goatskin	Use for abrasion resistance, general use. Suitable for medium-duty tasks.	284
	Canvas & Fabric	Cotton	General purpose. Suitable for light- to medium-duty tasks.	285–287
	Supported/Dipped	Typically Knit with foam Nitrile, Polyurethane or PVC	Chemical processing/handling, cleaning, oil refining, food processing. Suitable for medium- to heavy-duty tasks.	288–292
	Specialty	Lined & unlined Neoprene, Nitrile, Nylon	Rough, oily, abrasive, hot or cold environments. Suitable for heavy-duty tasks.	291–293

Glove Types

Disposable/Single Use – Gloves from these materials are economical, often disposable and appropriate for general use. These gloves that are approved for a variety of settings.

Knit – Knit gloves offer comfortable fit and good flexibility and can also be used as a liner for extra protection. Look for gloves featuring PVC dots for extra grip.

Driver's – Excellent strength and durability combined with comfort and protection. Look for designs with shirred or elasticized cuffs when you are concerned about keeping dirt and debris out of the glove. Provides abrasion resistance, dexterity, durability and comfort.

Canvas & Fabric – Provides durability, dexterity and comfort. Look for palms featuring PVC dots or natural or synthetic hide when greater grip is needed. These gloves can typically be laundered. When sturdy synthetic fabric is used, durability is increased along with resistance to abrasions, cuts and punctures.

Supported/Dipped – Degrees of protection vary, with coatings to protect against solvents and chemicals and provide protection from abrasions, punctures and cuts.

Specialty – Box handling and other heavy-duty applications that might require exceptional dexterity, grip, and imperviousness to liquids, impact cushioning and other protection. Specialty gloves feature palms, coatings and materials and thicknesses designed for the most demanding users.

TOP 5 BENEFITS OF NITRILE GLOVES

Disposable nitrile gloves offer superior performance in a variety of work applications. The top 5 benefits of using nitrile gloves are:

1. Nitrile gloves are 3 times more puncture-resistant than regular latex gloves.
2. Nitrile provides a stronger barrier of protection and offers greater chemical resistance.
3. Nitrile gloves have a lower resistance to friction, making them easier to put on and take off your hands.
4. Nitrile gloves do not contain any natural rubber latex, so they can be used by people with latex allergies.
5. Even though they are disposable, nitrile gloves can usually be worn more than once because of their superior puncture and tear resistance.

BENEFITS OF POLYETHYLENE GLOVES

Disposable polyethylene gloves are an economical solution for preventing bare-hand contact in food preparation. Their textured surface provides improved dexterity and reduces glove movement while working. A loose-fitting design is easy to wear when frequent glove changes are required. These gloves are ideal for food processing and handling, applying adhesives, dispensing drugs, painting, household maintenance, cleaning, polishing, gardening and yard work, grocery stores, restaurants, arts and crafts, decorating and more.

CHEMICALLY RESISTANT GLOVES

Working with chemicals requires a higher standard of protection. Specialty gloves help protect hands when exposed to harmful, skin-absorbent substances, severe cuts, lacerations or abrasions, punctures, chemical or thermal burns and temperature extremes.

Adequate specialty glove selection is based on the characteristics of the tasks performed, conditions present, duration of use and the hazards and potential hazards identified.

WE'VE GOT IT COVERED: Eye Protection

Personal protective eyewear, such as goggles and safety glasses, must be used in a workplace where an eye hazard exists.

Each day approximately 2,000 U.S. workers sustain an eye injury on the job that requires medical treatment. A third of the injuries are treated in hospital ERs and more than 100 of these injuries result in a day or more of lost work. The majority of these injuries result from small particles or object striking or abrading the eye.

When choosing eye protection, you'll want to analyze and identify the hazards of your workplace. Then, the choice can be made between safety glasses, goggles or a combination of faceshield with glasses or goggles as secondary protection.

Safety Glasses

Safety glasses protect against general impact. However, the speed of the impact must be taken into consideration. The higher the velocity, the more likely the safety glasses could be dislodged. In this case, goggles or a faceshield may be a better choice.

Goggles

Goggles are available in two styles. Direct vented or indirect vented.

Indirect Vented goggles are for protection against vapors, chemicals, liquids and dust.

Direct Vented goggles provide air flow to the eye area but are only approved for protection against particulates. Ideal for jobs such as grinding or cutting where dust is an issue.

Faceshields

Ideal for workers exposed to high speed flying particles or chemical splashes. These must be used in conjunction with safety glasses or goggles to protect against secondary hazards.

UV Protection

Crucial for workers exposed to ultraviolet radiation such as outdoor workers and welders.

Lens Coatings/Colors

Eye protection is available in a variety of coatings and lens colors.

Hard-coated – for applications where lens scratching is an issue.

Anti-Fog/Anti-Mist – for jobs where workers are exposed to extremes of temperature or warm humid environments.

Clear Lenses – for indoor or outdoor applications in below normal light conditions.

Gray or Brown Lenses – for outdoor use where above average light is available.

Amber Lenses – for applications where light conditions are below normal or where enhanced contrast is needed.

Eye protection should be fit to the worker or adjustable to provide for appropriate coverage. The worker's personal vision needs to come into play, with safety glasses that allow the user to wear their own glasses underneath.

You'll want to see good eye protection at work in your environment. Make informed choices and be safe.

GET SOME AIR: Using Respirators

The National Institute of Occupational Safety and Health, NIOSH, collaborates with industry partners and other government units to develop respirator standards in accordance with government regulations. Look for the NIOSH code that describes the standard appropriate to your workplace. Respirators reduce worker exposures when engineering control systems, such as ventilation and scrubbing systems, cannot. Employers can require workers to wear respirators to perform some tasks. Approximately five percent of all U.S. workers, in about 20 percent of all work establishments, wear respirators at least some of the time.

Particulate Respirators

Particulate filters are available in disposable or reusable models with replaceable filters. They cover the nose and mouth and provide protection from airborne particles including dust, mist, liquids and some fumes but not gases or vapors. They are rated by NIOSH according to what and how much they filter out. The ratings have a letter and number.

N – not oil proof

R – oil resistant (up to 8 hours)

P – oil proof (beyond 8 hours)

The numbers refer to the percentage of one-micrometer particles removed during trials. For example, a 95 rating indicates that the filter removes 95% of particles from the air.

Chemical Cartridge/ Gas Mask Respirators

Chemical Cartridge/Gas Mask Respirators contain replaceable carbon filters that absorb gas and vapor from the air. Reusable masks seal tightly around the edges to block out unfiltered air. Choose from Half-Mask, covering only nose and mouth, or Full-Mask, covering your entire face.

Several types of cartridge are available. These include chemical (blocks out vapors but not particles) and dual cartridge (includes a replaceable pre-filter for particulates).

These respirators help protect against certain airborne contaminants. Before use, the wearer must read and understand the USER instructions provided as a part of the product packaging. A written respiratory protection program must be implemented meeting all the requirements of OSHA 1910.134 including training, fit testing and medical evaluation. In Canada, SCA standards 294.4 requirements must be met and/or requirements of the applicable jurisdiction, as appropriate. Misuse may result in sickness or death. For proper use, see packaging instructions, supervisor or call 3M DR/ESD Technical Service in USA at 1-800-243-4630 and in Canada at 1-800-267-4414.

A. Kidde Bedroom Sealed Battery-Operated Smoke Alarm with Voice Alarm

No confusion here—this unit has a voice alarm that announces “Fire! Fire!” in addition to a loud, 85dB beep when smoke or fire is detected. Sealed-in lithium ion battery lasts the entire 10-year lifespan of the alarm. It’s quick and easy to install; alarm automatically activates when attached to the ceiling-mounting bracket. Smoke alarm contains photoelectric sensor that may detect visible particles associated with smoldering fires sooner than ionization alarms. Includes a test/hush button that tests alarm circuitry and temporarily silences nuisance alarms. Rapidly flashing LED lights alert users if alarm has sounded since the last time the test/reset button was used. Ceiling-mount style. 5.22-in. dia. x 1.6-in.

B. Kidde Sealed Battery Carbon Monoxide Alarm

Keep your family safe without the hassle of battery-replacement and maintenance. The sealed-in lithium-ion battery keeps this carbon monoxide alarm functioning for 10 years without the need for replacement. Easy-to-install alarm automatically activates when attached to the wall-mounting bracket. Test/reset button tests unit for proper operation and resets carbon monoxide alarm. Green LED flashes every 30 seconds, indicating unit is operating properly. Red LED will pulse and a loud alarm pattern will sound when a dangerous level of carbon monoxide is detected. Red LED will also flash every 60 seconds if a high level of carbon monoxide has been detected within 14 days. 4½w x 1½d x 2¾h.

C. Kidde Kitchen Smoke and Carbon Monoxide Sealed Battery Alarm

Make personal safety your priority with this durable combination smoke and carbon monoxide alarm, with a 10-year product life. This unit comes equipped with a sealed-in lithium-ion power supply that lasts the entire 10-year life of the alarm and eliminates concerns about battery removal and unauthorized alarm deactivation. It’s quick and easy to install; alarm automatically activates when attached to the ceiling-mounting bracket. Smoke alarm contains photoelectric sensor that may detect visible particles associated with smoldering fires sooner than ionization alarms. Includes a test/hush button that tests alarm circuitry and temporarily silences nuisance alarms. Rapidly flashing LED lights alert users if alarm has sounded since the last time the test/reset button was used. End-of-life warning alarm chirps every 30 seconds when unit is in need of replacement, but can be silenced three days at a time for 30 days to allow time for replacement. Ceiling-mount style. 5.22-in dia. x 1.6-in.

LADDER SAFETY

Ladders, when used properly, can make common large-scale jobs so much easier. And if used properly and according to safety guidelines, it can give many years of trouble-free service. However, if proper cautions are not taken, a ladder can create a potentially hazardous situation. Fortunately, many injuries can be avoided by following the following safety tips:

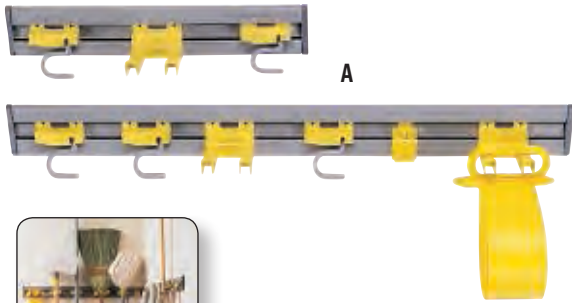

- Check the ladder for any loose screws, hinges or rungs.
- Clean off any mud, grease, oil, snow or other slippery liquids
- Keep your shoes clean; leather soles should never be used.
- Make sure to check if your ladder is damaged, broken or bent.

SQUEEGEES

Product Type	Benefit Feature
--------------	-----------------

Floor Squeegees

Clears floors of water and much more (page 354). Use to clear away large volumes of mud, snow, slush, and other debris. Squeegee frames are made with galvanized steel to withstand the heavier workload. Nylon inserts (page 354) adapt squeegees for use with Acme-threaded handles.

Sanitary Squeegees

Available as standard or brush/squeegee combination (page 354). Ideal for hospitals, bathrooms, kitchens, dairies, swimming pools and other areas where cleanliness is key. Durable polypropylene construction resists acids.

Water Wands

Wash and wipe away at the same time! Water Wands (page 353) combine with aluminum handles (page 353) to wash thoroughly and reach difficult spots. Use to clean grout, uneven surfaces, tiling, and more. After the washing is done, the squeegee's rubber blades whisk away standing water, leaving the surface finger dry. Adapters are available (page 357) to create Acme-compatible sockets on the wands, allowing for the use of tapered or threaded handles.

General-Duty Squeegees

Perfect for washing and wiping glass. Allows for easy handling and gentler use on fragile surfaces. Use the sponge for scrubbing, flip the squeegee over, then use the rubber blade for wiping water away. For use on vehicle windows, mirrors and smooth surfaces that need cleaning and instant water removal (page 356).

Window Squeegees

Wipe away water with a longer reach. The soft, thin rubber blade clears water from any smooth, flat surface and works perfectly on windows. Handle allows squeegee to be attached extension wands to reach higher areas (pages 356–357).

WATER WANDS

Digs deep into tile crevices and uneven floor surfaces to remove liquids, leaving floor finger-dry. Twin moss foam rubber blades. Choose from standard- or heavy-duty squeegee with rugged galvanized steel construction and splash guard. Tapered socket; use with Pro aluminum handles (sold separately). Water Wand Acme Insert (E) (sold separately) will convert water wand from tapered socket to Acme threaded socket.

TRUCKS

Product Type

Benefit Feature

Cube Trucks

Use these durable and versatile trucks for a variety of bulky, load-carrying tasks including waste collection, material transport and laundry. Available in four capacities. *(Find these on pages 362, 373.)*

Tilt Trucks

This truck maximizes maneuverability. The design matches the name: these trucks make it easy to dump contents. Ideal for handling bulky materials and loads that are medium to heavyweight. Wheels and the overall profile help protect surroundings. Consider your need for the lid option. *(Find these on pages 362, 363, 373.)*

Platform Trucks

Accommodate loads of varying shapes and sizes aboard a high-capacity platform truck. Depending on what you're moving, you'll want to look at support—more when you're loading multiple, hard-to-balance items, less when loads are more well-balanced. Some platform trucks offer work-height surfaces. *(Find these on pages 360, 361.)*

Hand Trucks

Carry a surprisingly heavy load with ease and agility with a two-wheeled hand truck. Buy a model that's dedicated to this role, or combine functionality with a convertible truck that switches from a two-wheeled configuration to a four-wheeled platform. *(Find these on page 360.)*

Convertible Trucks

Change configurations to use one truck in multiple applications. Some versions combine removable shelving with a more open platform truck option. Others provide support alternatives that adjust to the loads you're transporting. *(Find these on pages 360, 361.)*

Can Liner Color—Black, white and natural are the most common can liner colors. The “see through” quality of natural bags makes them ideal for environments where transparency is required for security purposes. If transparency is not required, black or white bags are preferred. Special color can liners (red, yellow, blue, brown, gray) can be used for at-a-glance content identification. For example, red bags are often used to indicate hazardous waste while blue bags may identify recyclable waste.

Can Liner Roll Types—A *bulk pack* consists of can liners that are separately folded, then stacked on top of one another or are folded together. A *cored roll* consists of can liners that are rolled together on top of a cardboard cylinder (similar to paper towel rolls). A *coreless roll* consists of can liners that are tightly rolled together without a cardboard cylinder. The can liners on both cored and coreless rolls may be connected by perforated edges or interleaved for nonperforated dispensing.

D. Glad® ForceFlex® Tall Kitchen Drawstring Trash Bags

Protect your office from trash disasters with Glad® ForceFlex® Tall Kitchen Drawstrings Trash Bags. This ultimate plastic garbage bag is 3 zones strong. One, the drawstring grips the can so the bag stays in place. Two, the unique diamond texture stretches around objects to resist rips and tears. Three, this durable bag prevents messy leaks. Once the bag is full, the drawstrings make it easy to lift and carry, so even the fullest garbage bags can be closed with one cinch and quickly tossed out. The 13-gallon size fits tall bins and uses less plastic compared to other flex-type, 13-gallon trash bags. They're great for offices, day care centers, schools and restaurants. 13-gallon size. 100 bags per case.

NEW!

Choose from two types of plastics

Linear Low-Density (LLD)

Tougher transport conditions require the superior tear resistance of LLD liners. This plastic is designed to perform in environments with higher risk of tears or punctures, either from the can liner contents, surrounding environment or through transportation to disposal units, as LLD does not tear easily even after puncture. (Find these on pages 390–393)

High-Density (HD)

When greater puncture resistance and load capacity are the priority, select HD liners. Even with thinner construction, HD liner material delivers puncture and load benefits—performing well with waste that is heavy, such as unbroken glass, or other materials that do not have sharp edges. (Find these on pages 393–396)

Strength grade and gauge

Throughout this section, you'll see items listed by strength grades as well as gauge. Here's how the two measures relate. Refer to this data to make the appropriate choice for your applications.

Light — Use for crumpled paper, cups and light waste.

Medium — Appropriate for packaging waste, wet paper and similar mixed trash.

Heavy — Choose for light wood, metal scraps and wet cardboard.

Extra-Heavy — Select for when trash is consistently heavy, wet or sharp.

Super/Extra-Heavy — Use on the heaviest cleanup jobs, in warehouses, cafeterias, or facility grounds.

Gauge Equivalents

Strength grades are based on static load, also known as lifting strength. LLD and HD plastic materials achieve the same static load with different gauges; order your bags accordingly. Use this chart for easy reference to determine approximate gauges.

Strength Grade	Linear Low-Density Mil Gauge	High-Density Micron Gauge
Light	.35 – .44	5 – 9
Medium	.45 – .57	10 – 12
Heavy	.58 – .69	13 – 14
Extra-Heavy	.70 – .89	15 – 17
XX-Heavy	.90 – 1.14	—
Super	1.15 – 1.39	—
Super-Heavy	1.40 – up	18 – 24

Capacity

Know the capacity of your receptacles and select the bag or liner to suit. Bags and liners are available in a multitude of sizes; gallon capacity is listed with each item throughout this section.

Bottom seals

Star-Seals — The most common type. Conform easily to any shape waste container, distribute weight evenly inside the bag and have the maximum carrying capacity.

Flat-Seals — Holds more volume than like-sized star seals. Appropriate for somewhat lighter weight loads.

Gusset-Seals — Another seal found in flat-style bags. Offer a good fit in certain receptacles and appropriate for somewhat lighter loads.

AMERICAN BORN

Although its name is derived from Hamburg, Germany and many, including Louis Lassen and Otto Kuase, claim credit for inventing the famed sandwich, most can agree the food favorite is all-American — with its birthplace being Athens, Texas in the late 1800s.

The SmartStock® brand cutlery dispensers owned by Dixie Consumer Products LLC is not available for sale, but will be subleased to end user customers via approved SmartStock® distributors. Any fee charged to an end user is a sublease fee. The terms of the sublease for all end users require that only SmartStock® brand cutlery be used in the dispenser. End users will receive a copy of the sublease terms. The sublease agreement will also register the dispenser for the Dixie Warranty Program.

A. SmartStock® Polystyrene Cutlery Dispensers

Each of these sturdy, visually appealing towers is designed specifically to hold and discharge one of three types of self-serve utensils—fork, knife or multipurpose spoon. There isn't a more efficient, orderly way for you to stock—and your customers to select—the cutlery that is an essential part of your everyday foodservice operation. Promotes good hygiene; enclosed design protects cutlery from contaminants. Speeds up restocking and frees up valuable counter space. Translucent Smoke. 10w x 8.78d x 24.75h.

BASICS OF SUGARCANE

Sugarcane, also known as bagasse, is a renewable, fast-growing resource that is grown for a number of purposes, like cane juice. Once the juice is extracted, the sugarcane stalk is usually incinerated or discarded. However, these crushed stalks can be saved and made into other items before they get thrown away. This material is reclaimed and used to make a variety of food containers.

CHAFING FUEL

Safely keep your food warm while staying cool to the touch! Chafing fuel is the best way to keep food warm, designed to burn under chafing dishes for up to 2 hours to maintain heat for buffets, cookouts and banquets. The odorless liquid fuel can be used as emergency heat or to cook with while camping, so you can enjoy the delicious smells instead of worrying about spills and unnecessary clean-up!
